

BPoF - structure

Be Part of the Future

Road Map (presenting the first project + a glimpse into to bigger BPoF plans)

Stage 1 - Welcome to the Future of Gaming

Q1

1. Team Onboarding
2. Creating the Play Ground

Q2

1. Initiate the future community
2. Ready Player One

Stage 2 - Mint of the Future Makers

Q3

1. Exclusive 5555 BPoF Pass Launch
2. Collaboration For The Future
3. Road To Future 7777 NFT Collection

Stage 3 - Let The Games Begin

Q4

1. Official Beta Game Launch
2. The market opens its doors
3. Mint to the Space 9999 NFT Collection

Stage 4 - An Ecosystem For The Future

Integrate all projects in the shared Metaverse

2023 - and forward

Why did it all start?

1. What is BPoF?

BPoF is a company that lives on a multi-blockchain platform that aims to be ahead of its time by participating fully in the still underdeveloped Crypto Gaming World and NFT investments.

BPoF has multiple purposes such as Creating and Developing play-to-earn Crypto Games, managing any revolutionary external NFT based crypto game or idea and evolving blockchains that promise a bright future.

2. Why did BPoF start?

The fast growth of Crypto Games was the main reason for BPoF's startup. Considering such an opportunity as investing and developing in an industry of this size on a low level of the digital coin market that is highly expected to turn around to its highest level and above, the decision of starting our company is self-explanatory.

3. What is the first step? (despre proiectul la care lucram acum)

The first step made by our company is the development of a complex, high-end, NFT Play-to-Earn Gaming project based on a Racing Game in which every player is the actual owner and future developer of the art used by the user.

How (how will BPoF make a difference?)

1. The Passport to the Future

- why are we focusing long term development?

We consider that the crypto-game ecosystem will rapidly be the replacement of the traditional ways of gaming.

We are focusing on developing more than a simple NFT project. Our purpose is to give our customers not only entertainment but also empower them to mix their relationships with the utility of their actions.

- what are the topics that we will focus on?

A complex gaming experience.

A good long term investment method.

A safe environment to grow their projects and share ideas.

- how are we going to deliver the content?

We are looking forward to engaging people in our community using all the relevant social media platforms. Our posts will be the main way of understanding and engaging you in every step of our projects. We will give people entertainment, knowledge, inspiration and various ways of feeling part of the company.

2. The three collections

- how will the system work?

Our first project, BPoF Racing, is divided into 4 main parts out of which the opportunity to join in rises on 3 different NFT minting occasions.

Phase 1 - the collection will contain 5555 Unique NFTs representing a TICKET. This is what we like to call these NFTs our FIDELITY CARDS. These will be the first people that will join our ecosystem and we plan to reward them in every move that we will make from now on. These TICKETS will provide unique advantages for its holders in our current projects and the ones to come.

Our game will consist of two different racing environments, on road and in the sky. For those explicit environments we created:

Phase 2 - the collection will contain 7777 Unique NFTs representing the cars that will be used in the gaming experience. The physics of the road cars will be configured to obtain the feel of a real-world racing car.

Phase 3 - the collection will contain 9999 Unique NFTs representing the flying vehicles used in The Galaxy part of the game. The physics of the flying cars will be configured to obtain a mix between the car driving and jet-flying experience.

- The first collection, why do you have to 100% get in first?

We consider our FIDELITY CARDS to be the best early investment ever in a project. We advise getting them for our investors interested in the BPoF company's momentary and future growth.

These cards give their owner the value of a whitelist member, priority and a settled place in future activities such as mints, insider info and DAO votes. Those will be the pinnacle of our Ecosystem. These assets will be our most valuable collection because they have utility throughout all our projects.

- what do we plan to achieve with the game?

One of our main goals will be achieved when we end the creation of an evolved racing experience that creates advantages for its players.

Also, the game will impact the way BPoF is seen by the audience. This is the project from which we want to gain trust and show that we are able to deliver what we promise.

- why you should invest in us?

To put it as clear as possible, the main reason is the Ecosystem that we are creating in the long run.

- why do we structure the project in a long term manner?

BPoF Racing represents only the first step toward our envisioned world. Through this project, we want to prove to the FUTURE MAKERS the opportunity

to join this world early and enjoy our future projects to the fullest.

3. Join forces (acquire trust/ partnerships)

- why are we doing this?

We believe that partnerships expand our knowledge, skills, and resources, allowing us to create better products and reach a larger audience. We are always open to hearing proposals and feedback that may help us improve. This is available the other way around as well since we care to provide suggestions to everybody that reaches our door. It is an ongoing process that we plan to sustain for the long run.

- when will this happen?

Throughout every development move that we will make. When launching something new or especially planning for the future, those are the most critical moments to be close to our community and investors.

- what are the benefits?

By doing this BPoF Gaming makes sure that it will grow beautifully in the right direction while also being a sponsor and support for the future projects to come. The African Proverb sums it up perfectly, “if you want to go fast go alone, if you want to go far go together”.

4. Staking system

- why are we doing this?

We're staking and compensating the community for holding their NFTs. We want to reward long-term investors, thus anybody staking will be considered a long-term investor. People who look to be here for the long run are desirable and this is just one of the ways we plan to show that.

- how will the staking system work?

Every collection that we drop will have the option to stake the NFT. Holders that have the FIDELITY CARDS are able to stake in every drop including both 7777 and 9999 car collections. Holders of one of our NFT cars collections can stake only in their designed drop.

See the breakdown below:

- I. 100 - 10% staking - Phase I (Fidelity Cards)
- II. 100 - 10% staking - Phase II (On Roan Cars) + 5% staking **ONLY** for holders of Phase I (Fidelity Cards)
- III. 100 - 10% staking - Phase III (Galaxy Cars) + 10% staking **ONLY** for holders of Phase I (Fidelity Cards)

We choose to be different from other staking systems. We do this by specifying exactly the amount we will give back and by providing a gamification method of doing so. By this we mean:

1. 2-20% random return a week, until we reach a total of 10% return - **Phase I holders**
 2-20% random return a week, until we reach a total of 10% return - **Phase II holders** & 1-10% random return a week, until we reach a total of 5% return - **Phase I holders only; Cumulated total of 15% return.**
 2-20% random return a week, until we reach a total of 10% return - **Phase III holders** & 2-20% random return a week, until we reach a total of 10% return - **Phase I holders only; Cumulated total of 20% return.**
2. All NFTs have the right to stake, with advantages of the first collection according to the mechanism previously explained
3. The duration of the staking is set to be between 1-3 weeks. If the percentages that we set to return are not reached (10%, 15%, 20%) the remaining quantity will be evenly distributed to all holders.

- sustainability for the long run

We have clear percentages that we plan to give, which are known since the beginning of each collection. We want to sustain this kind of benefit for our holders throughout all BPoF projects.

5. Mission, Vision, Values

- What do we aim to create?

Our vision is to create a world in which blockchain games are more widely adopted than traditional games.

Our mission is to build a hub where anyone with an idea can come and make it a reality. A community where individuals collaborate to create and learn from one another for the greater good and personal development.

- What are our 3 main values and what do these represent?
 1. **Transparency** - Every step along the process, we share and document. We accept that we are not perfect, that we will make errors, and that we will strive to correct them.
 2. **Quality** - we only make high-quality products that we are proud of. If we are dissatisfied with the outcomes of our actions, we would rather invest additional resources in order to achieve the desired level of quality.
 3. **Long Term** - If the aspects of the initiatives we aim to create/partner with do not have long-term potential, we will most likely say no.
- how do we see our community (what do we expect from them)?

BPoF Gaming looks at its community as investors. We value their loyalty, feedback and passion for gaming and web 3 in general. When we develop, we always have in mind the usage of our goods for our customers. Staking and in-game features are just some examples.

6. The game

- why are we doing this?

We want to create a game that breaks the barrier of low-quality games in the play to earn industry.

- what are we going to deliver?

A multi platform racing game with an original concept that engages players in a competitive manner. It will be divided into two separate racing worlds. The first one is suited for on-road racing enthusiasts while the other gives wings for a “gravity-defying” racing experience.

The main gameplay consists of one vs one race fully based on skill. Another way of enjoying the gameplay is racing against more than one player in custom lobbies.

There is also a single player game-mod that is useful for honing your skill and earning in-game rewards for your car.

- What is different about our products

Great looking unique NFTs, with industry-leading design.

In game customisable according to your market purchases. This allows making the NFT even more unique than it already is.

Our holders receive:

- I. The metadata of the NFT that can be used in whatever project that is not related to BPoF.
- II. It is not only an image/video of the NFT, it is the actual blended object with all its elements. (GLB)

7. Enlarge the Ecosystem

We plan to expand to other blockchains as well after we decide that there is an almost certain probability of growth. Furthermore, we take on other external projects that we will grow inside our company while also creating new projects of our own.

- how will we integrate the collections to come into the ecosystem?

The future BPoF world will be the Metaverse where all our collections will co-exist. Here we are talking about a virtual place in which our all NFTs create an immersive ecosystem. This will be the beginning of a new and exciting chapter.
